

Why OneLinkPDF for PDF Security

Share & track PDFs with one secure link — with tight access control

Core Protections

- Signed, token-based access with expiring links.
- View-only mode; disable download & print.
- Dynamic, identity-aware watermarks on every view.

Access Controls

- Restrict by domain or IP allowlist.
- Optional password-protected links for extra friction.

Visibility & Audit

- Real-time analytics: opens, location (approx.), device, time-on-page.
- Page-level engagement and in-document search terms.
- Export analytics via CSV/API; trigger workflows via webhooks.

Embed & Integrate

- Secure iframe embed for any website, CMS, or application.
- Developer-friendly APIs & webhooks; SSO available on Business plans.

Simple to Roll Out

- No-code, copy-paste embed. Set permissions in minutes.
- Upload & organize; optional OCR and full-text search.
